

Requirements Specification Document

DVD Lending System

DVD Borrowing System App

1. Scope

1.1 Identification

This document defines requirements for a web-based DVD Lending System used by a university media center to manage borrowing and inventory.

1.2 System Overview

The system replaces a paper-based checkout process with a digital solution.

Users can:

- Search DVDs
- Borrow and return DVDs
- View availability and due dates

The goal is a simple, usable system that improves tracking and reduces errors.

2. System Operation and Requirements

2.1 User Roles

- **Borrowers:** Search, borrow, and return DVDs
- **Staff:** Manage inventory and view overdue DVDs
- **Admin:** Manage system settings

2.2 Functional Requirements

Search DVDs

Users shall be able to search DVDs by title, genre, or availability.

Borrow DVDs

Users shall be able to borrow available DVDs.

- System shall prevent borrowing if already checked out
- System shall assign a due date

Return DVDs

Users shall be able to return DVDs.

- System shall update availability status

Inventory Management

Staff shall be able to add and remove DVDs from the system.

Overdue Tracking

Staff shall be able to view overdue DVDs.

3. Non-Functional Requirements

- System shall run in a web browser
- System shall use campus login for authentication
- Search results shall load within 2 seconds
- System shall maintain accurate and consistent data

4. Constraints

- Web application only
- No payment or fine system in initial version

5. Assumptions

- Users have valid campus login credentials
- Staff maintain inventory accuracy
